Teaching Experience

Introduction to Quantum Mechanics 1 – Fall 2016, Fall 2017, Fall 2018
Complex Variables – Winter 2020

With Nathaniel Craig in Fall 2017, I worked to overhaul the Introductory Quantum Mechanics course using active learning methods and placing increased effort on pedagogy and on instructor accessibility. This worked marvelously and students both had better learning outcomes and reported feeling more comfortable in the classroom and with the material. Since then, our model has been implemented by many of the physics classes.

Leadership Experience

High Energy Grad Seminar Series

Organizer Sept 2017 – Sept 2019

In addition to organizing the seminar series, this position rendered me the spiritual leader of the high energy theory graduate students. In that role I've worked hard to create a welcoming and supportive environment and to foster a collaborative community.

Penn Secular Society, *Founder*

President Jan 2012 – May 2014

I created PSS to fill a void in the dialogue on campus surrounding philosophy, science and theology, and to provide community for a then-unrepresented population of students. The group became well-known at Penn for its efforts to encourage people to think critically about their beliefs, and fully succeeded in influencing and improving campus dialogue.
